Vantage West Credit Union Chooses AccelOps to Speed Audit and Compliance Functions

Financial institution plans to replace several homegrown systems with AccelOps

SANTA CLARA, Calif. - Oct. 24, 2013 - Vantage West, the largest credit union in Southern Arizona, has chosen AccelOps' analytics-driven IT Operations Management for cloud and virtualized infrastructures to automate its audit and compliance functions.

With more than \$1.2 billion in assets, Vantage West is the largest credit union in Southern Arizona, serving more than 115,000 members through its branches, online banking system and call center. Headquartered in Tucson, Ariz., the organization has 15 branches in Pima, Pinal and Maricopa counties.

AccelOps' virtual appliance software manages security, network performance and compliance, all on a single screen. AccelOps automatically discovers, analyzes and automates IT issues in machine and big data across organizations' data centers and cloud resources, spanning servers, storage, networks, security, applications and users.

"Compliance is an issue for all financial institutions," said Steve Mott, senior vice president of technology at Vantage West. "Tools like AccelOps play a critical role in keeping our network secure."

AccelOps provides the most automated compliance reports out of the box, including PCI DSS, HIPPA, ISO, SOX, GLBA and COBIT.

"The key is knowing who's going on in your network, on every device, all the time, in real time," Mott said. "AccelOps gives us that visibility into events in real-time."

AccelOps provides world-class automated discovery of all devices throughout a company's infrastructure, and alerts immediately when anything changes or is updated.

"We couldn't find anything else that competed," said Stefan Harris, vice president of technology at Vantage West. "AccelOps will make our annual formal audits much easier. We no longer will have to manually review multiple logs for anomalies. Using AccelOps, all that will be automated, making our audit reviews much easier."

Vantage West chose AccelOps over a solution offered by Datalink. Mott expects that AccelOps will replace six or seven point solutions, some of which are homegrown and open source.

"We're delighted to have Vantage West utilize our solution," said Flint Brenton, AccelOps president and CEO. "Financial institutions across the country are discovering the many advantages of AccelOps. Our world-class IT operations management software delivers a solid return on investment for organizations of all sizes."

About AccelOps

AccelOps provides analytics-driven IT Operations Management for cloud and virtualized infrastructures. The virtual appliance software manages security, network performance and compliance, all on a single screen. AccelOps automatically discovers, analyzes and automates IT issues in machine and big data across organizations' data centers and cloud resources, spanning servers, storage, networks, security, applications and users. AccelOps' patented analytics engine with cross-correlation sends real-time alerts when deviations occur that indicate a security or performance-impacting event. The AccelOps platform scales seamlessly and provides unmatched delivery of proactive security and operational intelligence, allowing organizations to be more responsive and competitive as they expand their IT capabilities.
